Forward-Looking Statements

This presentation contains forward-looking statements. All statements other than statements of historical facts contained in this presentation, including statements regarding our future results of operations and financial position, business strategy, prospective products and product candidates and their development, regulatory approvals, ability to commercialize our products and product candidates and attract collaborators, reimbursement for our product candidates, research and development costs, timing and likelihood of success, plans and objectives of management for future operations, our ability to obtain and maintain intellectual property protection for our product candidates and their development, competing therapies, and future results of current and anticipated products and product candidates, are forward-looking statements. These statements involve known and unknown risks and uncertainties, such as experienced with the COVID-19 outbreak, and other important factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements, many of which are disclosed in detail in our reports and other documents filed with the Securities and Exchange Commission. Because forward-looking statements are inherently subject to risks and uncertainties, some of which cannot be predicted or quantified and some of which are beyond our control, you should not rely on these forward-looking statements as predictions of future events. The events and circumstances reflected in our forward-looking statements may not be achieved or occur and actual results could differ materially from those projected in the forward-looking statements. Except as required by applicable law, we do not plan to publicly update or revise any forward-looking statements contained herein, whether as a result of any new information, future events, changed circumstances, or otherwise. Certain information contained in this presentation and statements made orally during this presentation relate to or are based on studies, publications, surveys and other data obtained from third-party sources. In addition, no independent source has evaluated the reasonableness or accuracy of Soligenix, Inc. internal estimates and no reliance should be made on any information or statements made in this presentation relating to or based on such internal estimates.

Company Description

Soligenix, Inc. is a late-stage biopharmaceutical company focused on developing and commercializing products to treat rare diseases where there is an unmet medical need

Two areas of focus:

- A ***Specialized BioTherapeutics segment*** dedicated to the development of products for orphan diseases and areas of unmet medical need in oncology and inflammation
- A ***Public Health Solutions segment*** that develops vaccines and therapeutics for military and civilian applications in the areas of ricin exposure, emerging and antibiotic resistant infectious disease, and viral disease including Ebola, Marburg and COVID-19

Investment Highlights

- Robust pipeline consisting of multiple fast track and/or orphan designated products, with potential for significant commercial returns of ~\$2B in global annual sales
- Late clinical-stage assets, one with successful Phase 3 data readout
 - **Cutaneous T-cell lymphoma (HyBryte™ or SGX301)**
 - **Positive statistically significant results achieved in first Phase 3 study**; published JAMA Dermatology
 - Actively engaged in FDA discussions regarding design of second confirmatory Phase 3 study
 - Significant commercial opportunity in area of unmet medical need; **estimated global market potential >\$250M**
 - **Psoriasis (SGX302)**
 - **Positive and statistically significant results achieved in Phase 1/2 proof of concept (POC) study**
 - Phase 2a study in mild-to-moderate psoriasis **enrolling patients**
 - Significant commercial opportunity in area of unmet medical need; **estimated global market potential >\$1B**
 - **Behçet's Disease (Pentoxifylline or PTX)** – *under exclusive option agreement with Silk Road Therapeutics*
 - **Positive statistically significant results achieved in Phase 2 POC study**; potential to advance to Phase 2/3 study
 - Significant commercial opportunity in area of unmet medical need; **estimated global market potential >\$200M**
- Collaborations with biotech, academia and government agencies
- Non-dilutive government funding helps cover operating expenses
 - NIH grant awards supporting vaccine development; potential for up to 3 Priority Review Vouchers (PRVs)
- Experienced management team and renowned advisors with record of success

HyBryte

(hypericin sodium) ointment 0.25%

Development Pipeline – Rare Diseases

Specialized BioTherapeutics

Product Candidates*	Preclinical	Phase 1	Phase 2	Phase 3	NDA Review	Market
HyBryte™ (<i>synthetic hypericin sodium</i>) Cutaneous T-Cell Lymphoma (CTCL)	ORPHAN & FAST TRACK DESIGNATION			Positive Phase 3 study results; Actively engaged in FDA discussions regarding design of 2 nd Phase 3 study		
SGX942 (<i>dusquetide</i>) Oral Mucositis in Head & Neck Cancer**	FAST TRACK DESIGNATION			2 nd Phase 3 study contingent upon additional funding and/or partnership		
SGX203 (<i>beclomethasone dipropionate</i>) Pediatric Crohn's Disease**	ORPHAN & FAST TRACK DESIGNATION			Phase 3 study contingent upon additional funding and/or partnership		
PTX (<i>pentoxifylline</i>) Behçet's Disease**	ORPHAN & FAST TRACK DES			<i>Exclusive option agreement with Silk Road Therapeutics;</i> positive proof-of-concept demonstrated in Phase 2 study; potential to advance to Phase 2/3 study		
SGX302 (<i>synthetic hypericin sodium</i>) Mild-to-Moderate Psoriasis				Positive proof-of-concept demonstrated in Phase 1/2 pilot study; Phase 2a study enrolling patients		

Public Health Solutions**

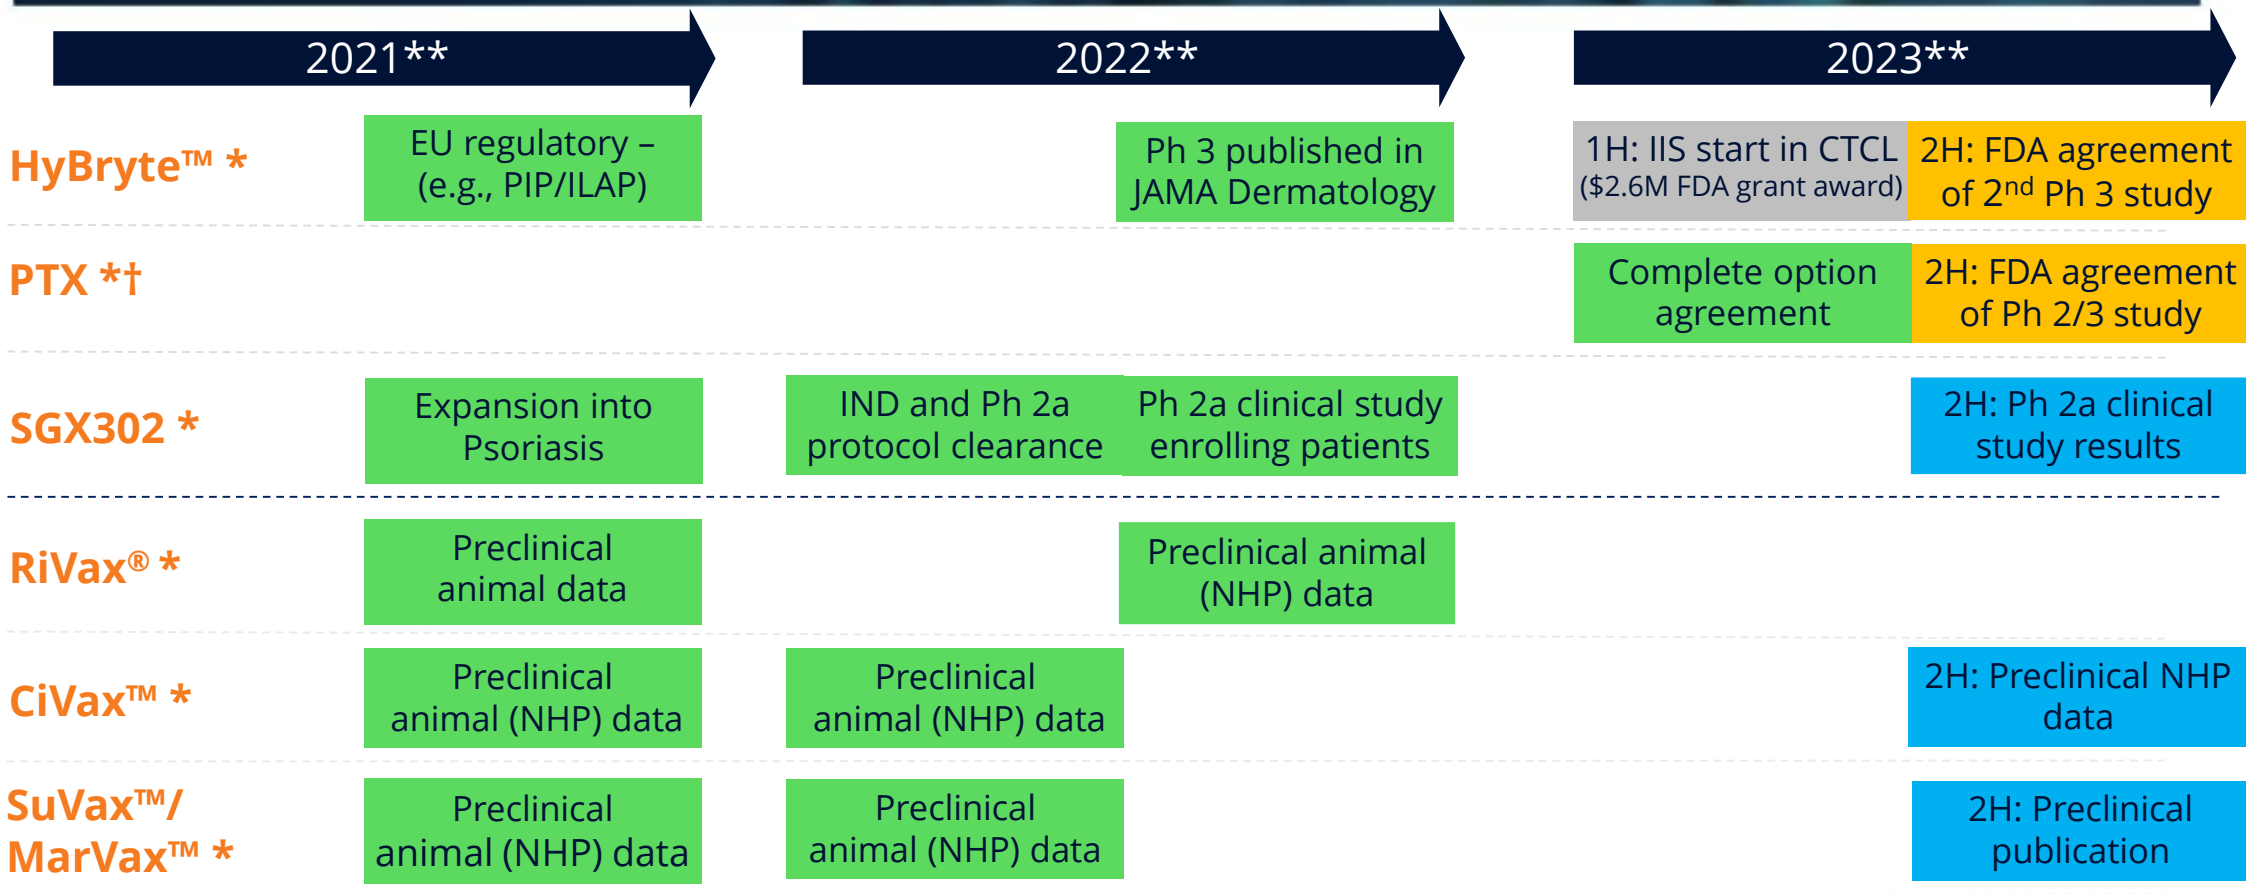

Product Candidates (FDA Animal Rule)*	Proof-of-Concept	IND	Phase 1	Phase 2/3	BLA Review	Market
RiVax® + ThermoVax® – Vaccine Ricin Toxin Pre-Exposure	ORPHAN & FAST TRACK DESIGNATION			NIH Contract Awards of \$30M to date; positive preclinical and clinical data		
SuVax™ / MarVax™ + ThermoVax® – Filovirus Vaccines				NIH Grant Subaward of \$700,000 to date; positive preclinical data		
CiVax™ + ThermoVax® – Vaccine COVID-19				NIH Grant Award of \$1.5M to date; positive preclinical data		

 Denotes funding in whole or in part by NIH, DTRA, BARDA and/or FDA

* Anticipated event and timing subject to COVID-19 disruption

** Potential value drivers dependent on continued government funding and/or other funding sources

Multiple Potential Value Drivers

Green = achieved
 Blue = data read-out
 Grey = clinical
 Orange = regulatory

* Potential value drivers dependent on continued government funding and/or other funding sources
 ** Timelines subject to potential disruption due to COVID-19 outbreak
 † Exclusive option agreement with Silk Road Therapeutics

Total Addressable Global Market

Assumptions⁽¹⁾

- Cutaneous T-Cell Lymphoma**
27,000 Patients US
20,000 Patients EU
- Mild-to-Moderate Psoriasis**
3,000,000 Patients US
5,000,000 Patients EU
- Pediatric Crohn's Disease**
80,000 Patients US
80,000 Patients EU
- Behçet's Disease ***
18,000 Patients US
80,000 Patients EU
- RiVax® Ricin Vaccine**
Assumes 5 year procurement order of \$200 million (PRV potential)
- SuVax™ Ebola Vaccine**
Assumes 5 year procurement order of \$150 million (PRV potential)

Cutaneous T-Cell Lymphoma – Disease Overview

- **Cutaneous T-cell lymphoma (CTCL)**
 - Rare class of Non-Hodgkin's Lymphoma (NHL)
 - Malignant T-cells migrate to the skin
 - Cancer forms patches, lesions or tumors
- **CTCL affects over 40,000 NHL patients worldwide; currently no cure**
 - \$250 million total addressable global market; >\$90 million in US
- **Two main subtypes of CTCL**
 - Mycosis fungoides (MF) – Early-stage (I-IIA) most common, 88% 5-year survival rate
 - Sézary syndrome (SS) – Advanced-stage, 24% 5-year survival rate
- **No approved first-line therapy for early stage (I-IIA) CTCL (~90% of CTCL patients); *unmet medical need***

Atypical T-cells
in dermis

HyBryte™ – Synthetic Hypericin Sodium Ointment + Light Activation, First-in-Class

➤ Treatment safe and well-tolerated

- **Minimal reported adverse events**
 - Other CTCL treatments characterized by acute and chronic side effects
- **Uses visible fluorescent light**
 - **Not** carcinogenic unlike other UV phototherapy or photodynamic therapy

HyBryte™
(hypericin) ointment 0.25%
+ Visible Light

➤ US/EU orphan designations; US fast track status

➤ Rapid treatment response

- Phase 3 data demonstrates **statistically significant efficacy as early as 6 weeks** with improved responses through 12 weeks (40%) and 18 weeks (49%)
 - Most early-stage CTCL treatments require *at least 12 months* to observe a statistically significant response
- **Effective against patch and deeper plaque lesions**
 - Other early-stage CTCL treatments known to be useful against patches but lacking in efficacy against plaques

HyBryte™ – Phase 3 Clinical Trial

referred to as the “FLASH” (Fluorescent Light And Synthetic Hypericin) Study

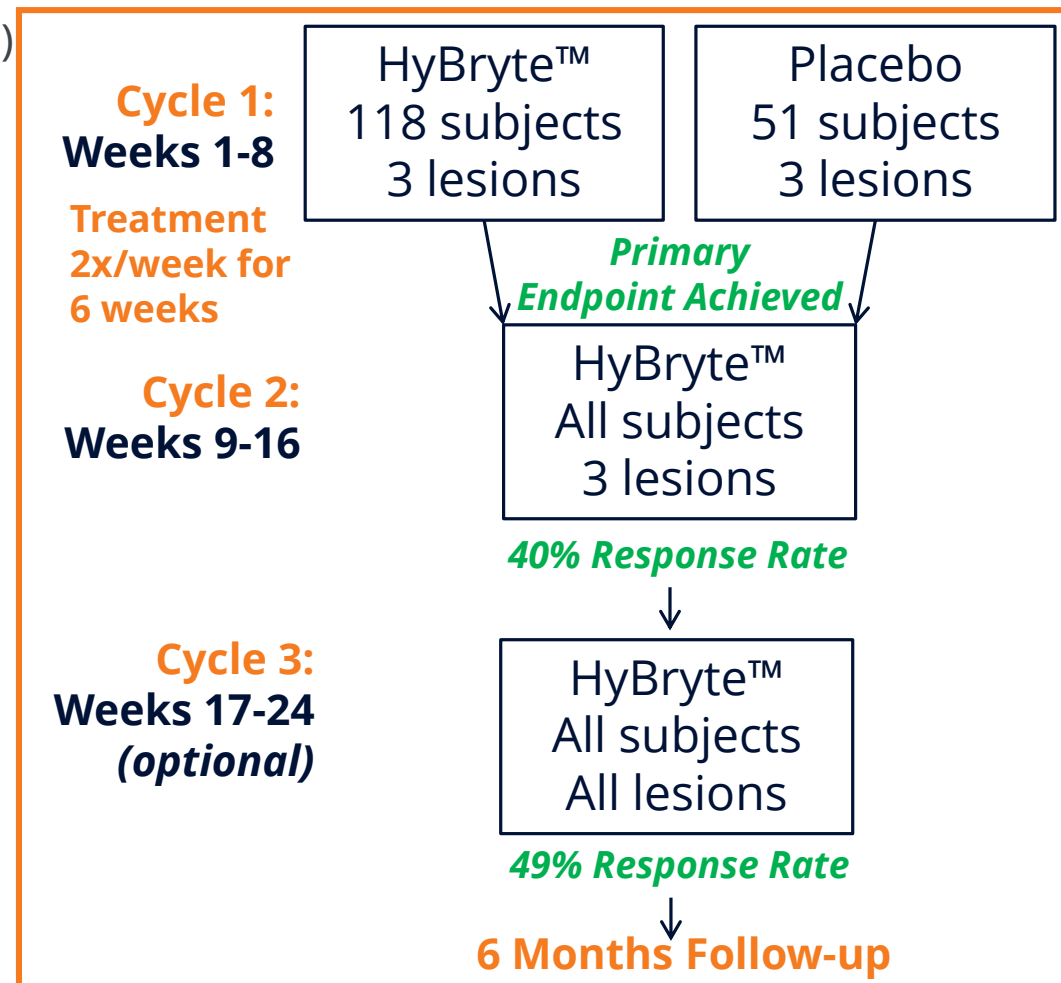

(JAMA Dermatology. Published online July 20, 2022. doi:10.1001/jamadermatol.2022.2749)

➤ Highly powered, double-blind, placebo-controlled, randomized

- Randomized 2:1 (HyBryte™ [synthetic hypericin 0.25%] : placebo)
- **Cycle 1 complete: Primary Endpoint (response rate) statistically significant (p=0.04)**
 - **Primary endpoint:** Percent of patients achieving $\geq 50\%$ cumulative reduction as assessed by Composite Assessment of Index Lesion Severity (CAILS) score for 3 index lesions at the end Cycle 1 (week 8)
- **Cycle 2 complete: Statistically significant improvement in treatment response of 40% (p<0.0001)**
- Statistically significant improvement in **BOTH patch and plaque lesion responses** after Cycle 2
 - **Plaque: 42% improvement (p<0.0001)**
 - **Patch: 37% improvement (p=0.0009)**
- **Optional Cycle 3 complete: Statistically significant improvement in treatment response of 49% (p<0.0001)**

➤ Secondary Endpoints

- Treatment response (including duration), degree of improvement, time to relapse and safety

HyBryte™ – Development Status

- Successfully completed pivotal Phase 3 FLASH study in 2020 to support potential U.S. marketing approval
 - Largest double-blind, randomized, placebo-controlled clinical trial ever conducted in CTCL population
- HyBryte™ new drug application (NDA) for early-stage CTCL submitted to FDA Dec. 2022
- FDA NDA Refusal to File (RTF) letter received Feb. 2023
- Type A meeting (Apr. 2023) outcome: 2nd confirmatory Phase 3 study of similar design but longer comparative treatment duration than FLASH study required
 - FDA thinking had evolved since protocol discussions for FLASH study
 - Obtained significant insights into FDA thoughts on clinical study designs
- Actively engaged in discussions with FDA to expeditiously obtain agreement on a feasible design for a 2nd study that would be highly executable as quickly as possible
- Potential for HyBryte™ marketing approval Ex-U.S. with Phase 3 FLASH study still being evaluated/pursued

Significant opportunity for improvement to current treatment paradigm in early stage CTCL

Early Stage CTCL Treatment Paradigm

Topical steroids

(Typically pre-Dx, not often efficacious; not approved for CTCL)

HyBryte

(hypericin sodium) ointment 0.25%

(Approved in CTCL 1st line)¹

Mechlorethamine
(2nd line)

nbUVB²
(Not approved
for CTCL)

**Topical
Retinoids**
(2nd line)

PUVA³
(Not approved
for CTCL)

Current Treatment Landscape

- Because of chronic nature of early stage CTCL and long-term treatment cycles, clinicians choose therapies with better safety profiles first and foremost
- Clinicians see critical need for additional treatment options with fewer side effects
- NB UVB and PUVA are not targeted therapies and have serious side effects with extended use (e.g., melanoma)
- NB UVB is used on 20%-50% of early-stage CTCL patients, despite not being approved

"[We] only have two FDA approved drugs with lots of side effects." — Specialist Dermatologist at Center of Excellence

Empiric Tx

CTCL Dx Tx

HyBryte™ a Significant Commercial Opportunity Addressing a Clear Unmet Need

Unmet Need

- Clinicians see need for additional treatment options with fewer side effects
- Most patients cycle through several treatments over course of their disease
- Chronic nature of early stage CTCL and dissatisfaction with current therapies provides opportunity for HyBryte™

Positive Feedback

- Derms like *efficacy* of HyBryte™; rapid response with equal effect on both patches and plaques
- Derms like *safety* of HyBryte™; use of safe, visible light vs. UV light exposure
- 4 of 5 Derms likely to prescribe HyBryte™

Efficient Commercialization

- Planned launch focused on high volume CTCL specialists
- Targeted sales force of ~20 reps; reaching >80% of high volume prescribers
- Partnership with medical device company, Daavlin, allows convenient end-to-end business solution for companion light unit to customers

Sales Potential

- Treatment will not have large financial impact on payers; low/no barriers to access as reimbursement can occur under existing CPT code
- Competing 2nd line products with inferior profiles have achieved similar sales
- Life cycle management upside, with potential to transition to home use setting

HyBryte
(hypericin sodium) ointment 0.25%

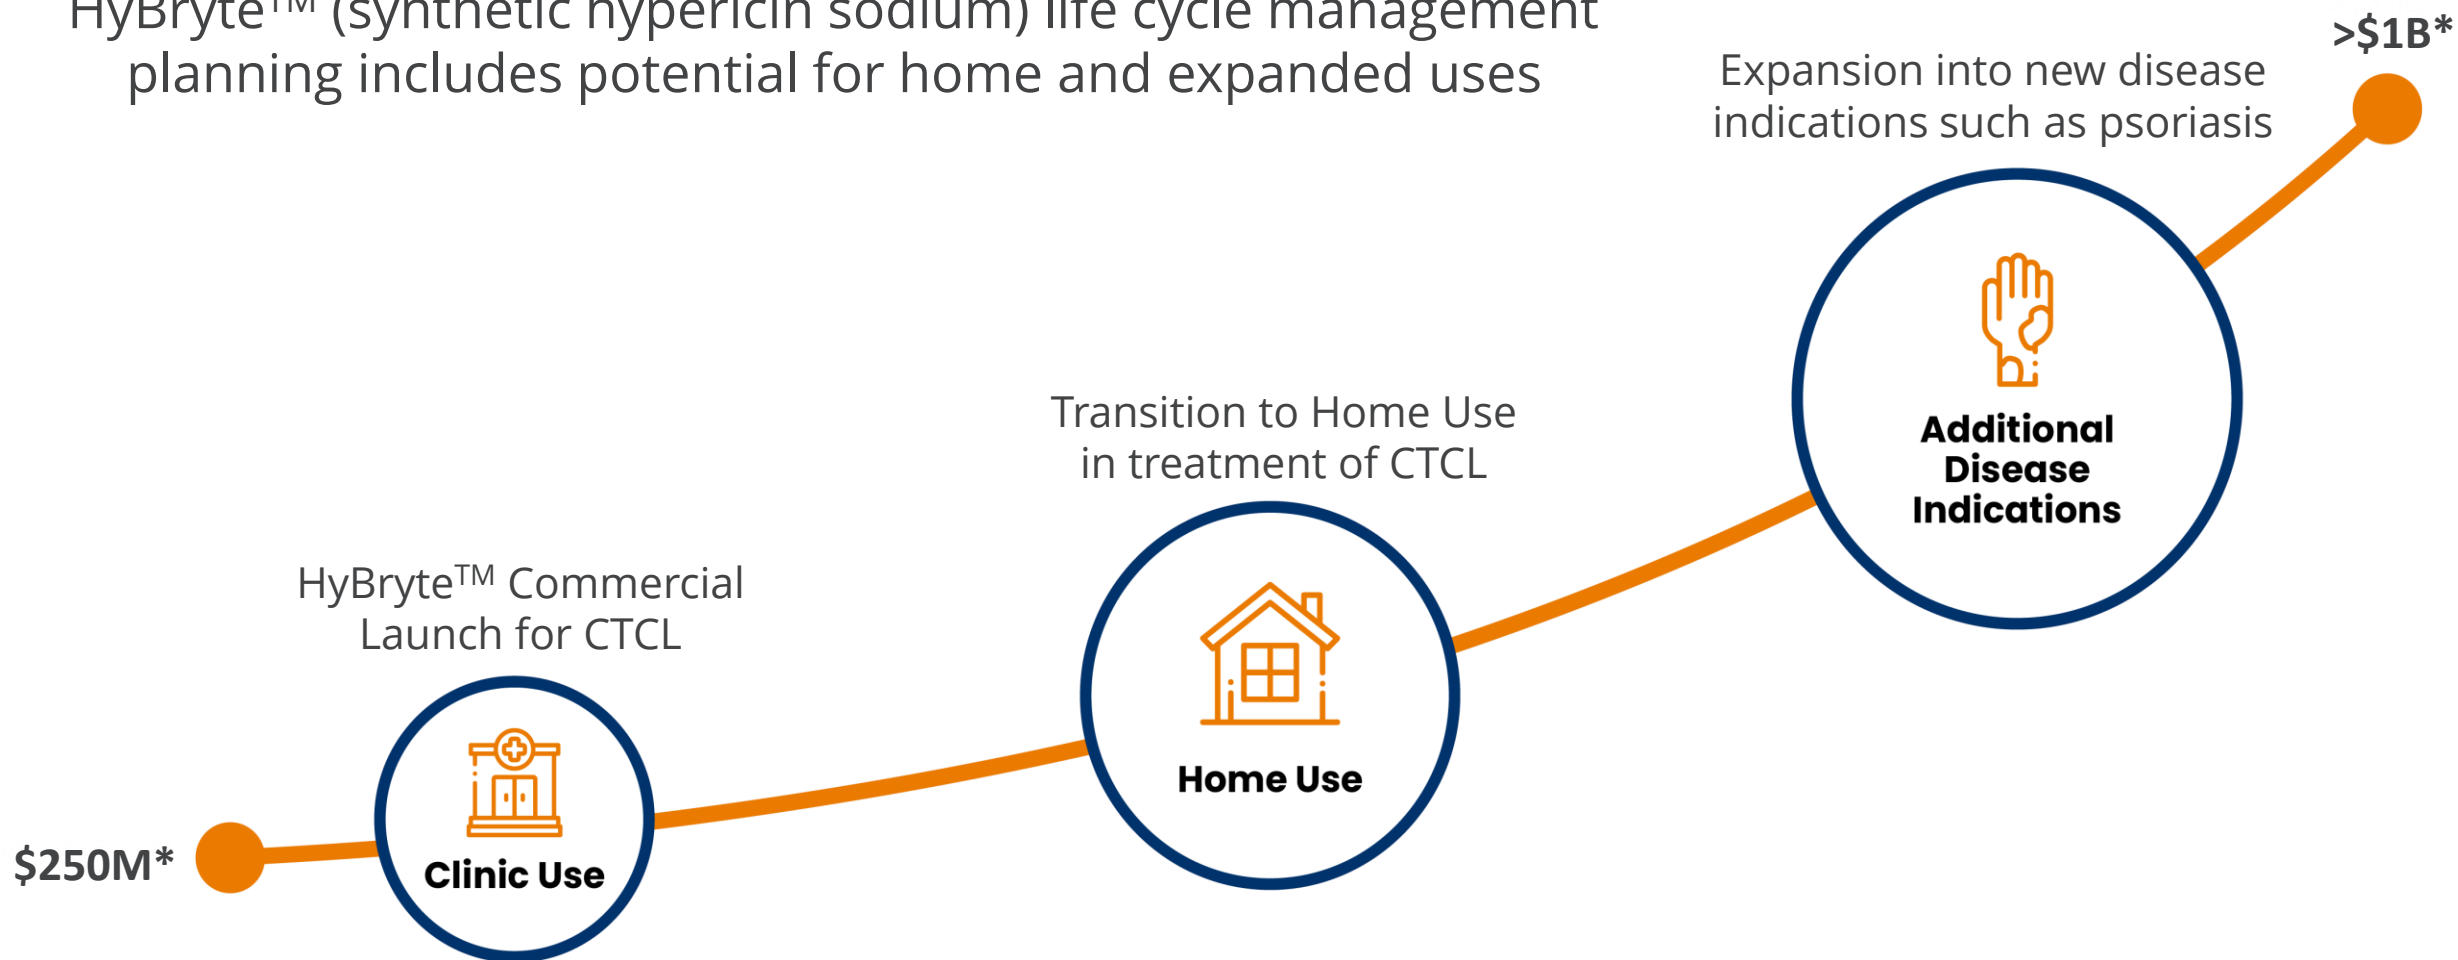

>\$90M
US Annual
Net Sales

Psoriasis and SGX302 (Synthetic Hypericin)

- **Caused by dysregulated T-cells**
 - Affects 60-125 Million people worldwide
 - Affects 8 Million people in the US
- **SGX302 – visible light activated photodynamic therapy**
 - Same active ingredient as HyBryte™ but may involve a new formulation
 - Focused on mild-moderate patients, especially the majority with mild-moderate plaque disease
 - Positive Phase 1/2 pilot study complete; Phase 2a clinical trial enrolling patients
 - Plan to offer in-clinic or at-home use
- **Advantages**
 - Other photodynamic/phototherapy approaches in psoriasis use UV light, with significant side effects including risk of cancer
 - Other skin-directed therapies have limited efficacy or can cause localized skin damage
 - Not addressing severe disease (and therefore not competing with biologics or systemic therapies)
- **Targeted skin directed therapy for mild-to-moderate psoriasis patients (~70% of psoriasis patients); underserved market opportunity**

HyBryte™ Life Cycle Management

HyBryte™ (synthetic hypericin sodium) life cycle management planning includes potential for home and expanded uses

* Total addressable global market

Public Health Solutions

Addressing Critical Concerns for Industry and Government

Public Health Solutions Segment

Funded by Government – Medical Countermeasures (MCMs) for Civilian and Military Use

Public Health Solutions**

Product Candidates (FDA Animal Rule)*	Proof-of-Concept	IND	Phase 1	Phase 2/3	BLA Review	Market
RiVax ® + ThermoVax® – Vaccine Ricin Toxin Pre-Exposure						NIH Contract Awards of \$30M to date; positive preclinical and clinical data
SuVax ™ + ThermoVax® – Filovirus Vaccine for Sudan Ebola						NIH Grant Subaward of \$700,000 to date; positive preclinical data
MarVax ™ + ThermoVax® – Filovirus Vaccine for Marburg						NIH Grant Subaward of \$700,000 to date; positive preclinical data
CiVax ™ + ThermoVax® – Vaccine COVID-19						NIH Grant Award of \$1.5M to date; positive preclinical data

 Denotes funding in whole or in part by NIH, DTRA, BARDA and/or FDA

* Anticipated event and timing subject to COVID-19 disruption

** Potential value drivers dependent on continued government funding and/or other funding sources

With FDA MCM approvals, potential to be awarded:

- **Up to 3 Priority Review Vouchers (PRVs have sold for ~\$100 million)**
to be used for future programs or sold, and/or
- **Government Procurement Contracts**
for supplying strategic national stockpile

SuVax™ / MarVax™ – Filovirus Vaccine Candidates

Heat-stable single-vial bivalent SUDV + MARV vaccine provided **100% protection** against **SUDV and MARV** challenge

SUDV Challenge at Week 12

Market Opportunity

- Filovirus infections (*Zaire ebolavirus*, *Sudan ebolavirus*, *Marburg marburgvirus*) are deadly; only Zaire strain vaccines are available and requires $\leq -60^{\circ}\text{C}$ shipping/storage
- Disease-endemic areas benefit from ability to avoid cold-chain distribution
- Government has placed priority on development activities, with *Marburg marburgvirus* and *Sudan ebolavirus* areas of unmet medical need
- Potential for SuVax™/MarVax™ to qualify for Priority Review Vouchers

Development Status

- Collaboration with the University of Hawai'i at Mānoa, under NIH grant
- Demonstration of efficacy in NHPs
- Bi- and Tri-valent mixtures feasible
